X-CSL-Package. New models.

X-Plane

Posted by : Almik Posted on : 21-08-2016

As shown by statistics, in the IVAO network 98% of all flights on the Boeing 737-300 Classic operate on IXEG 737 Classic for X-Plane. Of course, we could not pass by this important statistics relating directly to our simulator. So we made a new big package:

- Boeing 737-300 (classic, sharklets)

Run the X-CSL-Updater and get all the updates!
